Summary

Artificial Intelligence (AI) and Machine Learning (ML) are the new drivers for the industry 4.0 revolution. Its use is becoming widespread across society. The dawn of AI and ML can also be witnessed in the pharmaceutical industry. The manufacturing sector has been significantly impacted by AI-ML. The ability of ML strategies to predict future events has allowed for the deciphering of complicated patterns in manufacturing patterns. This has opened the avenues for an intelligent decision support system in different manufacturing tasks like intuitive and continual inspection, fault detection, quality enhancement,

Report on

K. K. Wagh College of Pharmacy in Collaboration with K. K. Wagh Institute of Engineering Education & Research, Nashik-03

Date: 19/12/2022 to 24/12/2022

Time: 10.00 am to 05.00 pm

Venue: KKWIEER AICTE IDEA-Lab.

Skilling Program Topics

- Introduction to Advanced Manufacturing Systems
- Hands-on training on 3-D printer, Laser cutting M/c, 3-D Scanner, Wood Router, Drone Assembly.

Outcomes:

- Make graduates more imaginative and creative
- Train students on 21st Century skills
- Train teachers in teaching-learning processes, research and projects
- Transform engineering education
- Encourage students to get involved in projects and internships

Total number of students participated: 47 S Y B Pharmacy (2022-23)

Vision: To develop the institute as a global brand, imparting quality education in the pharmacy field, thereby, creating competent and expert pharmacists ready to serve the healthcare industry and society.

Phone: (0253) 2510262, 2517003

**Advanced Manufacturing Systems
a multi-disciplinary approach**

(19th Dec to 24th Dec 2022)

Under

“AICTE IDEA LAB”

**K.K.Wagh Institute of Engineering
Education & Research Nashik
(9 Programs NBA Accredited,
NAAC “A” Grade)**

About The Institute

The institute was established in the year 1984 at Bhausaheb Nagar (Tal. Niphad, Dist. Nashik) and shifted to Nashik City in September 1986.

The institute is approved by All India Council of Technical Education (AICTE), New Delhi and Government of Maharashtra, permanently affiliated to Savitribai Phule Pune University and has recognition under section 2(F) and 12(B) of (UGC ACT 1956). The institute is adjudged as Grade 'A' by Government of Maharashtra. The institute is Accredited by National Assessment & Accreditation Council (NAAC) with 'A' Grade, Accredited by HIACT International. It is only institute in Nashik to be grouped thrice under “Platinum Category” by AICTE-CII Survey of Industry Linked Institutes and according to NIRF ranking survey 2016 ranked 85th amongst all engineering institutes in India.

About AICTE IDEA LAB

Based on this interaction, 49 institutions are selected for the award of AICTE-IDEA Lab across India in June 2021 for 2020-21. K. K. Wagh Institute of Engineering Education and Research (KKWIEER) is one of them. KKWIEER is the only institute from Savitribai Phule Pune University, Pune to be selected for the AICTE-IDEA lab scheme. The lab is named as KKWIEER-IDEA Lab.

The purpose of a KKWIEER-IDEA lab is to provide all facilities under one roof for the conversion of an idea into a prototype. With this facility on the campus students and faculty members will be encouraged to take creative work and in the progress, get training on critical thinking problem-solving, collaboration, etc. which conventional labs are not able to. The focus will be on training students so that they become imaginative and creative. The whole idea is to transfer engineering education with such a lab in all colleges. All the students will be exposed to the KKWIEER-IDEA lab by organizing training sessions for interested students as well as supporting projects and by providing online learning.

Teachers will also be trained in these labs to know their scope and opportunities in teaching-learning processes as well as research and development projects. Students will also be encouraged to work with faculties on R&D projects and internships which involve the utilization of KKWIEER-IDEA lab facilities.

Vision of the KKWIEER IDEA LAB

Empowering students to generate, develop and commercialize innovative ideas

KKWIEER-IDEA Lab Mission

- Discover innovative technological solutions for industries
- Solve societal and agricultural problems
- Promote creative thinking and problem-solving approach
- Encourage start-ups and attain self-sufficiency

KKWIEER-IDEA Lab Objectives

- Make graduates more imaginative and creative
- Train students on 21st Century skills
- Train teachers in teaching-learning processes, research and projects
- Transform engineering education
- Encourage students to get involved in projects and internships

About The Program

This Six Days Skilling Program on "Advanced Manufacturing System - a multi-disciplinary approach" under AICTE Idea Lab, is intended to provide participants with hands on practice on advanced manufacturing systems. Also, it provides opportunity to participants to work in team, build integrity and work in multidisciplinary fields. This Skilling Program throw light on successful implementation of Advanced Manufacturing systems by use of technology and problem solving skills such as Design Thinking. Using advanced machines participants will prepare prototype.

Skilling Program Topics

- Introduction to Advanced Manufacturing Systems
- Hands-on training on 3-D printer, Laser cutting M/c, 3-D Scanner, Wood Router, Drone Assembly.

Participants:

The students, of the AICTE approved institutions, Research scholars, PG Scholars.

Registration:

Registration should be done using below link :

<https://forms.gle/ziVktNmZaLEaUjH9>

or

Scan QR Code for registration

Last Date of registration: 18/12/2022

Instructions:

1. All registered participants are required to fill a consent form for confirmation of their participation in the skilling program. The registration will be approved by the organizer only after receipt of the consent form.
2. Attendance in all sessions is mandatory with minimum of **80%**.
3. A test will be conducted by the coordinator at the end of the program.
4. After registration participants should join what's app group of Skilling Program.

Link to join what's app group:

Hypertension seminar and health checkup camp Report

- Date: 6/7/2022
- Time: 10.00 am to 5.30 pm
- Venue : Seminar Hall, K. K. Wagh College of Pharmacy, Nashik
- Beneficiary: Total 110 students and Staff were benefitted from the camp
- Resource Person- Dr. Dinesh Deore and Dr. Meena Sonone and Shree Yash Hospital Team
- Objective of the seminar- The objective of seminar was students and staff should get knowledge about hypertension and prevalence as well as how to prevent hypertension related complications.
- Outline Programme- Students and faculties of K.K. Wagh Education Society attended this program in the seminar hall. The program was started with an introduction about the content of the seminar which was delivered by Dr. S. M. Kamble. Welcome speech delivered by Dr. R. D. Amrutkar and felicitation of guest done by Dr. R. D. Amrutkar and Dr. S.M. Kamble. Introduction of guest delivered by final year students Shreya.
- Outcome of seminar- Students as well as faculties of K.K. Wagh Education Society attended this seminar. The participants of the seminar got elaborate information regarding hypertension, its prevalence and preventive measures for hypertension. It was found that 5 % prevalence was there in youngsters.
- Number of participants- 110 and staff

**Report on seminar on “Eye Diseases and Eye Health” &
“Eye Checkup Camp”**

Date: 12/04/2022

Time: 10.00 am to 11.30 am

Venue: Seminar Hall, K.K.Wagh College of Pharmacy, Nashik.

Resource persons: Dr. Jayanand Urkude, Senior Register ASG Eye Hospital, Nashik

Objective of the Program: To create awareness regarding various eye disorders and eye health in students. To conduct eye checkup camp for students and staff.

Audience: Third year B.Pharmacy, Final year B.Pharmacy and First year D. Pharmacy students
(Total no:167)

Outcome of program: 167 students and 22 staff members were benefitted from program and 200 free coupons were provided by ASG eye hospital, Nashik.

Keynotes by speaker:

- Detailed description of anatomy and Physiology of eye.
- Introduction to various eye disorders
- New technologies for lens treatment
- Detailed information regarding Cataract disease and surgical methods for it.

Abstract

Newly synthesized 1,2,4-triazole containing 1,3,4-oxadiazole derivative acts as an antifungal agent which inhibits CYP51. Lanosterol 14 α -demethylase is the target for azole antifungal agents. This work emphasizes to build 3D model structure of cytochrome P450 lanosterol 14 α -demethylase of *Candida albicans* from *saccharomyces cerevisiae* by using 3LD6 as a template. The reliability of the models was assessed by Ramachandran plots and Profile-3D analysis. Docking identified the binding mode of derivatives in modeled CYP51. In docking studies N-4 nitrogen of the 1,2,4-triazole interacts with the heme portion of the porphyrin ring of the target receptor along with hydrogen bonding, Pi-stacking, and hydrophobic bonding. Among all derivatives APC-1, APC-3, APC-7 were found to have 1 significant interactions with the active site of the receptor by calculating dock scores and binding energies. So, it can be concluded that the structural model of CYP51 can be used for the optimization and designing of the newer antifungal agents.

Key Words: Homology modelling, Molecular Docking, Lanosterol 14 α -demethylase, *Candida albicans*, 1,2,4-triazole containing 1,3,4-oxadiazole derivatives

Graphical Abstract

Introduction

Over the past decade, fungal infections have become a major complication and cause of morbidity and mortality in immune compromised individuals such as those suffering from tuberculosis, cancer, acquired immune deficiency syndrome (AIDS), and in organ transplant cases. [1-3] Azoles are a large and relatively new group of synthetic compounds. Imidazole's and triazoles are two azole derivatives employed in the treatment of systemic fungal infections as well as in the agriculture. 4-6] Azole antifungal agents inhibit the cytochrome P450 sterol 14 α -demethylase (14DM, CYP51) by a mechanism in which the heterocyclic

Formulation of oxybutynin chloride microparticle-loaded suppositories: in vitro characterization and in vivo pharmacokinetic study

Anjali Bedse^{1*}, Hitendra Mahajan² and Suchita Dhamane³

Abstract

Background: Oxybutynin chloride (OXC) is used to treat overactive urinary bladder. OXC is metabolized in the liver to N-desethyloxybutynin, which is mainly responsible for the anticholinergic side effects of OXC. Conventional oxybutynin suppositories formulated earlier have shown most common side effects, such as dry mouth, constipation and serious anticholinergic reaction. Hence the present research work deals with the formulation and characterization of OXC microparticle-loaded mucoadhesive suppositories which may remain adhered in the lower rectum and avoid first pass metabolism. The emulsification-ionic gelation method is employed to prepare OXC microparticles. Two formulation factors at three levels, i.e. polymer concentration and stirring speed, were selected. Sodium alginate (concentration 1–2%) and 1% w/v Carbopol 971P were used to prepare OXC microparticles. OXC microparticles were evaluated for various parameters such as production yield, entrapment efficiency, mucoadhesive strength, shape, size, zeta potential, Fourier Transform Infrared spectroscopy, differential scanning calorimetry, X-ray diffraction, in vitro dissolution studies and stability studies. Suppositories loaded with OXC microparticles were prepared by the fusion method using Poloxamer 188 and propylene glycol and evaluated for various parameters like weight variation, disintegration time, in vitro dissolution study, stability study and pharmacokinetic study.

Results: Results of in vitro characterization revealed that optimized batch of OXC loaded microparticles exhibited production yield 94.024% entrapment efficiency 95.378% and mucoadhesion strength 95.544%, particle size range 764.04–894.13 µm, zeta potential – 14.5 mV, with 0.946 desirability. Consequences of DSC and XRPD evaluation shown that drug was effectively entrapped inside the microparticles. In vitro release studies revealed improvement in drug dissolution as a consequence of its entrapment into microparticles. SEM results showed that micelles were sphere-shaped. On rectal administration of OXC microparticles loaded suppository in male Sprague–Dawley Rats, the relative bioavailability was found 173.72%.

Conclusion: In vivo study elicits rapid increase in absorption of drug from microparticles loaded suppository when compared with the oral formulation and drug loaded suppository in rats. OXC microparticles loaded suppository is novel and promising drug delivery system for rectal administration and may avoid anticholinergic side effects of hepatic metabolite, N-desethyloxybutynin. These rectal drug delivery systems will be advantageous for efficient absorption of drugs and to avoid first pass metabolism.

ABSTRACT

Dapsone is a Biopharmaceutical Classification System class II drug with anti-inflammatory, immunosuppressive, antibacterial, and antibiotic properties and is used as an antileprotic. The purpose of the present study was to investigate the potential of a microemulsion formulation for topical delivery of dapsone to enhance permeation and to avoid systemic side effects. When administered orally, dapsone undergoes hepatic metabolism. Its hepatic metabolite, dapsone hydroxylamine, shows systemic side effects such as hemolytic anaemia peripheral neuropathy, nausea, and headache. A novel drug delivery system in the form of a microemulsion was developed for dapsone. This is the first attempt that dapsone has been combined with chaulmoogra oil in a topical microemulsion. The primary drugs used for the treatment of leprosy are found in chaulmoogra seeds. Considering its good solubilizing capacity and its use in the treatment of leprosy, chaulmoogra oil was chosen as the oil phase. Based on emulsification ability, Cremophor RH40 and PEG 400 were selected as surfactant and co-surfactant, respectively. A pseudo-ternary phase diagram was constructed to identify the microemulsion region. Smix (Cremophor RH40: PEG-400 in the ratio of 1:2) was most effective in imparting stability to the formulation. The selected formulation exhibited appropriate diffusion behavior (*in vitro*). The developed dapsone containing microemulsion formulation exhibited the optimal homogeneity, clarity, pH, type of microemulsion, viscosity, percent drug content, and percent transmittance to qualify as a topical drug delivery system for local treatment of leprosy.

Microemulsion, Dapsone, Topical drug delivery system, Chaulmoogra oil, Anti mycobacterial activity, HET-CAM test.

INTRODUCTION

Leprosy, or Hansen's disease (HD), is a bacterial disease known from historic times, although curable, it continues to be a significant health problem worldwide. This disease affects mainly the peripheral nerves and skin, but may also affect sites such as the eyes, mucous

membranes, bones, and testes and produces a spectrum of clinical phenotypes (Saonere, 2011).

Dapsone is the principal drug in a multidrug regimen recommended by the World Health Organization for treating leprosy. Dapsone is a sulfone with anti-inflammatory, immunosuppressive, antibacterial and antibiotic properties. The water solubility of dapsone is

Pharmacokinetics

ABSTRACT

Recent clinical studies demonstrated that certain natural polyphenols like flavonoids present in dietary supplements modify the pharmacokinetics of some co-administered drugs. Number of herbal remedies interact selectively with different CYP₄₅₀ isoenzymes and hence alter CYP-mediated drug metabolism and pharmacokinetics. Drug-polyphenol interaction may alter drug bio availability through altered absorption, distribution and metabolism. There is need to collect clinical evidences to support whether the effect of drugs and polyphenols co-administration rather than relying on in-vitro experiments or animal studies. Herbal drugs containing variety of polyphenols interact with CYP₄₅₀ enzymes leading to either induction or inhibition of CYPs which alters the pharmacokinetic parameters of their respective substrate drugs. This information will be helpful for physicians and pharmacists to alleviate risks associated with polyphenolic remedies as well as to realize the benefits of alternative medicine.

More than 8000 polyphenolic compounds have been identified in various plant species, having several important functions. The phenolic groups in polyphenols can accept an electron to form relatively stable phenoxyl radicals, thereby disrupting chain oxidation reactions in cellular components.¹ In addition to fruits and vegetables, leaves, nuts, seeds, barks and flowers are also rich sources of polyphenols.² On the basis of in vivo or in vitro evidence, inhibition of the CYP forms responsible for the metabolism of co-administered drugs has been proposed as the mechanism responsible for the pharmacokinetic interactions caused by flavonoids.³ Flavonoids have high potencies and selectivities for inhibition of CYP1A

isoenzymes.⁴ Polyphenols may be classified into different groups as a function of the number of phenol rings that they contain and of the structural elements that bind these rings to one another. The main classes include phenolic acids, diferuloylmethanes, flavonoids, stilbenes and lignans. Phenolic acids are further classified as hydroxycinnamic acids (e.g. Caffeic acid, Caftaric acids) and hydroxybenzoic acids (e.g. Ellagic acid, Gallic acid, Corilagin). Diferuloylmethanes are phenolic compounds with two aromatic rings substituted with hydroxyls, and linked by aliphatic chain containing carbonyl groups (e.g. Curcumin).

The major and most abundant class within the dietary polyphenols is flavonoids and is further classified as: Anthocyanidins (e.g. Cyanidin, Delphinidin, Pelargonidin) and different Anthoxanthins including Flavonols (e.g. Myricetin, Quercetin, Kaempferol), Flavanones (e.g.

Solubility and dissolution is an essential requirement for any drug to perform well in vivo. The present research was undertaken to enhance the dissolution rate of poor water soluble drug Etodolac through solid dispersion and complexation technique. Fusion method and kneading methods were employed for solubility enhancement by Solid Dispersion technique and complexation technique respectively. PEG-6000, HPMC K4M, β -Cyclodextrin and PVPK-30 are used as carriers. Physical mixtures were prepared in different ratio of drug and carriers. The prepared blends were evaluated for solubility, drug content, percent yield and drug release. Solubility enhancement was observed for all the experimental mixtures having maximum attainment for polymers PEG 6000 and PVPK-30. Pre and post enhancement Etodolac solubility values confirm the successful modification in solubility of drug through solid dispersion technique and complexation technique with slight edge toward complexation technique.

KEYWORDS: Etodolac, Solubility, Solid dispersion, Complexation, Carrier.**INTRODUCTION:**

Solubility and dissolution of drugs is a crucial prerequisite to the performance of the drug in vivo. The major share (90%) of the active pharmaceutical ingredients in the development pipeline and 40 % of the drugs in the market are poorly water soluble. Hence, solubility is still an important area of the research.^{1,2} According to the Noyes-Whitney equation, the dissolution rate of a drug substance is directly proportional to its equilibrium solubility.³ However, the nature of the dissolving solid and the dissolution medium also exert strong influences on the dissolution rate.⁴ Various physical, chemical and miscellaneous approaches have been used to enhance the solubility and dissolution of the poorly water soluble drugs.^{5,6}

However, solid dispersion or complexation is still preferred technique to improve solubility due to its obvious advantages. The term solid dispersion refers to a drug-polymer two component system generally consisting of a hydrophilic matrix and a hydrophobic drug prepared by hot melt extrusion, melting (fusion) method or solvent evaporation method.^{7,8} Usage of solubilizing complexing agent can solve the poor aqueous solubility problem by forming guest (non polar region of one molecule) - host (cavity of another molecule) complexes.^{9,10} Small molecules or larger molecules can be taken up by supramolecular cyclic structures. This inclusion complex is possible because of the central cavity in their structure and these so formed cyclic molecules have been explored as drug delivery systems.¹¹ Etodolac is a nonsteroidal anti-inflammatory agent and inhibitor of prostaglandin synthetase. Etodolac is absorbed from the gastro-intestinal tract with peak plasma concentrations being attained about 1-2 h after ingestion. Etodolac is poorly water soluble, and slightly soluble in simulated gastric fluid. The delayed onset of action is the result of limited dissolution rate due to poor solubility therefore its bioavailability is expected to be limited by its dissolution rate, which could be increased

Design and development of fast dissolving liquisolid formulationBhamare Vaibhav G^{*1}, Kamble Ravindra K²¹K. K. Wagh College of Pharmacy, Nashik, Maharashtra, India²Bhupal Nobles' College of Pharmacy, Udaipur, Rajasthan, India**ABSTRACT**

Various techniques have been employed for the solubility modification of BCS class II drugs. Out of the recent solubility enhancement techniques, Liquisolid technique based on the work of Spireas et al has explored as method that can supplement drug release. Formulations containing Etodolac were developed by dissolving the drug in a non-volatile solvent and then employing the adsorption principle with a carrier and coated material admixture. The post formulation saturation solubility study has highlighted significant modification in solubility of the drug in comparison to pre solubility modification. The Liquisolid formulation then subjected to direct compression for the development of Fast dissolving tablet formulation using two varying concentrations of Sodium Starch Glycolate. The in vitro - in vivo evaluation of research study concludes adaptability and applicability of fast dissolving liquisolid tablet formulation allowing it to overcome barriers associated with the solubility. The optimized formulation found to unveil dissolution along with diffusion from the dosage form by Fickian mechanism.

INTRODUCTION

Solubility phenomena have great influence on pharmaceutical industry. [1]. Post administration of drug by oral route, the absorption and bioavailability of drug in systemic circulation is limited by its solubility and permeability. [2]. The BCS plays vital role for formulation scientist, for advising strategy to increase the effectiveness of drug development by proper choice of dosage form and bioequivalence tests. [3]. Numerous researches on solubility enrichment of BCS class II or class IV drugs have rooted various techniques. [4-6]. Liquisolid approach has been lately explored as a method for improved drug release. [7]. It is therefore proposed that a mathematical model implemented and validated by Spireas and coworkers measures necessary quantities of carrier polymer and coating material. [8, 9] to achieve a drug embedded system a system with appropriate flowability and compressibility. In continuation with the solubility enhancement, formulation development has been one tool that has impact on patient compliance. Fast dissolving tablet formulation gaining wide popularity in terms of its bioavailability in shorter duration of time and usefulness toward population in comparison to conventional tablet formulation.

MATERIALS AND METHODS

free sample. The rest of the ingredients were of analytical quality. Throughout the investigation, distilled water was used.

Experimental

Analytical characterization. [10, 11]. The identity of the drug was confirmed by comparing IR spectrum using FTIR (Shimadzu Affinity press FTIR 1800), thermogram using DSC (Shimadzu DSC 60) and X-Ray powder diffraction spectra (Shimadzu XRD-7000). Same procedure has been employed to identify incompatibility issues (if any) generated when the drug is formulated into fast dissolving tablet formulation post Liquisolid treatment.

Saturation solubility study of drug. [12, 13]. Solubility studies were carried by shake flask method where excess of sample is added into the fixed volume of solvent. The saturated solutions were continuously shaken round-the-clock and the resultant solutions were filtered, appropriate dilutions were prepared and UV absorbance was recorded. The same procedure is employed for formulation post Liquisolid treatment.

Design of Liquisolid system with mathematical modeling. [14-17]. It is suggested that a mathematical model executed and

Chapter 7

Growing impact of herbal bioenhancers in pharmaceutical industries

Abstract: Ayurvedic expertise has made a significant contribution to drug research in the world, with new methods of identifying active compounds. In comparison to modern medicines, herbal medicines have succeeded to emphasize the world for their use, with advantageous therapeutic effects and fewer adverse effects. However, in vitro/in vivo findings for these herbal drugs or extracts are not so impressively correlative. Poor lipid solubility, improper molecular size, and prolonged therapy of phytoconstituents leads to poor absorption, followed by poor bioavailability and treatment expenses. Herbal bioenhancers are nontherapeutic active phyto-molecules that, when co-administered at low doses, improve the bioavailability, bioefficacy, and biological activity of different drugs without having a synergistic impact with medication. Since herbal bioenhancers are healthy, nontoxic, inexpensive, easy to obtain, nonaddictive, pharmacologically inert, and nonallergenic, they are enticing pharmaceutical industries as a valuable and most effective means of bioavailability enhancement. Nowadays, industries are focusing on improvement in pharmacokinetic parameters of potent active pharmaceutical ingredients using various bioenhancing mechanisms that can help through alteration in enzyme activity, phytosomal formulation system, escape protein modifications, effects of cholagogic or choleretic agent, and heat production in the organism. An emphasis is made to tackle multidrug resistance in the treatment of infectious diseases. Bioenhancers significantly contribute to the drug development process, with innovative methods for identifying active compounds, using natural drugs and products. Herbal bioenhancers are becoming increasingly popular as a paradigm-shifting technology for improving the bioavailability and bioefficacy of various classes of drugs, nutraceuticals, and veterinary medicines, thanks to recent advances in drug delivery.

Webinar Report

‘Ocean of Career Opportunities in Clinical Research’

Date: 11/01/2022

Time: 11.00 to 12.00 Noon

Venue: Online Google Meet Platform

Resource person:

1. Mr. Bharat Kshirsagar Sr. Manager, Biocon Pharmaceuticals Bangalore
2. Miss Parnavi Raval, Director. Ingenious Healthcare.

Webinar link:

<https://meet.google.com/yoo-ttup-pjh>

Objective of the webinar: To increase awareness regarding carrier opportunity in the field of clinical trial.

Outcome of webinar: Students as well as faculties of K. K. Wagh Education Society College of Pharmacy, Nashik attended this webinar.

The participants of the webinar got elaborate information regarding clinical trial and opportunities in the clinical trial. They got to know about where to apply, how to apply, and what knowledge updation needed to grab the opportunity in clinical trial. The details cycle of drug development and the role of PV department in complete process was discussed briefly. The webinar has enabled the participants to learn to excel the idea of future in clinical research industry.

Day 1 (Theory session 08-01-2022)

Mr. Rohan Pawar gave a talk about UV-visible spectroscopy, gas chromatography, and high-performance liquid chromatography. He talked over the principles, workings, instrumentation, and applications of all of these advanced instruments in detail. He also highlighted drug quantification using a UV-Visible spectrophotometer.

He also explained about how HPLC and GC were used to separate, identify, and quantify each component in a combination. He also discussed daily life applications of these instruments.

He also discussed on GLP. He explained to participants how to apply these good laboratory techniques into effect in regular practical sessions. He also described how GLP can assist enterprises and research centres in maintaining product uniformity, consistency, reliability, reproducibility, quality, and integrity.

DAY 2 (Practical session 09-01-2022)

Demonstration of following instruments conducted by staff at Analytical Research and Training Center. Now almost every student knows how to use these sophisticated instruments.

Abstract

Pharmaceutical field is widely focusing on solubility parameter models to select solvent or non-solvent that can enhance solvency of drug. Solubility Parameter is very useful concept in understanding the mechanism of solvent and solvency behavior with their applications in pharmaceuticals to open the door of research having focus on theoretical considerations of solubility. Hildebrand and Hansen Solubility Parameter are frequently used to identify solvents.

Keywords: Solubility; Solvation; Hildebrand Solubility Parameter; Hansen solubility parameter

1. Introduction

Currently solubility study is on the peak point of formulation scientist and the basic reason is existence of nearly 70% drug in class II of BCS classification [1]. Solubility Parameter is very useful concept in understanding the mechanism of solvent. Hildebrand is the first one to coin the term solubility parameter [2,3]. The Solubility Parameter is a numerical figure which gives solvency behavior of specific solvent [4].

Various Solubility Parameter like Hildebrand Solubility, Hansen Solubility, Fedors, Van Krevelen are in use to depict the solvency behavior of solvent [5]. The Solubility Parameter, which expresses the cohesion between like molecules, is obtained from heat of vaporization, internal pressure, surface tension and other properties as expressed by Hildebrand and Scott [6]. Coating's pharmaceutical, cosmetics foodstuffs are produced as multi- component chemical mixture and Hildebrand solubility Parameter and Hansen solubility parameter plays vital role to meet environmental shelf life and product quality specifications of these compounds [7].

The solubility of drug is very important for pharmaceutical industry. Solubility means ability of solute to dissolve in a solvent especially water [8]. According IUPAC solubility is defined as ratio of designated solute in solvent [9]. Solubility plays major role in the manufacture of liquids orals as well as in the manufacturing of parenteral formulations, also it is important to obtain desired concentration of drug in systemic circulation for getting pharmacological response. The solubility of drugs in gastrointestinal fluids is an important step for absorption of drugs. Thus, solubility phenomenon is important in pharmacy [10,11,12].

2. Solution as a system

A solution is a special type of homogeneous mixture composed of two or more substance. A Solvent is a substance that dissolves a solute resulting in a solution. The substance dissolved is called as the solute [13,14,15,16]. Solvents plays vital role like applying coatings, removing stains or adhesive. Choice of solvent mainly depend on factors such as

Soft Skill Development Program Report
GTT Barclay's Life Skills Development Program

Date: 10/08/2021 to 12/08/2021

Time: 1.00 to 5.00

Resource person: Ms. Padmini Bhasin (Global Talent Track, Pune)

Online platform: Microsoft teams

Registration link:

https://teams.microsoft.com/l/meetup-join/19%3ameeting_Yzc3MWMzMzktZjc5MC00OGE2LWFIOGYtZWZjZTRIY2Y1NzNi%40thead.v2/0?context=%7b%22Tid%22%3a%221e6930fc-bd66-47b0-a26454160263b94e%22%2c%22Oid%22%3a%227dd81ed2-7f4e-4ec2-81b6-1e431f06e9a8%22%7d

Objective of the Program: To give insight of and develop the necessary Soft Skills

Outcome of webinar: Students of Second year and Third year attended this program. The participated students got descriptive information on:

- Interview Skills
- Resume Building
- LinkedIn profile management
- Corporate Readiness
- Time management
- Stress management
- SWOT analysis

Students got to know Do's and Don'ts with respects to Resume, Social Media profile management, Body Language, Interaction with people, Teamwork, time and stress management. The program proved useful as it enriched the knowledge of participated students regarding the soft skills.

Number of participants: 110

Event co-ordinator: Prof. Snehal Jadhav

STUDENTNOTICE

All the students of Third Year and Final Year B. Pharm are hereby informed that a prestigious program of **PHARMASOFT SKILL DEVELOPMENT** has been jointly arranged by **K.K. Wagh College of Pharmacy and Global Talent Track –Barclay, Pune.** College has borne the charges of the program

All students listed in below attached list are instructed to attend the same on online platform. Attendance is compulsory and will be monitored.

Kindly go through following detail information.

TOPIC: PHARMA SOFT SKILL DEVELOPMENT

Trainer: Ms. PadminiBhasin, Soft Skills and Behavioural Trainer

Program Date- 10th August 21 to 12th August 21

Time- 1.00 PM to 5.00 PM

Link will be shared soon

RAP[®]

Analytical Research
and Training Center

Affiliated & Accredited by

RAP Analytical Research and Training Center, Nashik, established in 2012 an organization which is devoted to develop candidate's analytical, clinical, technical and industrial skills while they run towards their successful career in the field for Pharmaceutical, Chemical, Clinical, Biological, Biotechnological, Microbiological, Petrochemical, now a days IT and many more..

Training Courses

Hands-on Training on Analytical Instruments

HPLC | GC | UV-VIS | Disso | DT | Friability

- Hands on Training
- Standard operating procedure
- Theory Lectures
- Qualitative & Quantitative Analysis
- Variable Parameters
- Troubleshooting
- Duration: 1 month
- Objective exam assessment
- Certificate on completion
- Private staying facility
- Industrial Documentation
- Interview assistance

Medical Coading

CPC Certification Training

- ICD
- HCPCS with sample model papers
- Duration: 3 months (Weekends)
- CPT
- Interview assistance
- Online / Offline

Academic-Industrial Training

- Instrument's demonstration
- Highlights on quality control
- Duration: 1 month
- Relevant for all from Pharma & Science field
- GMP/GLP/GDP guidelines
- Need of Research
- Certificate on Completion

Courses Resuming Shortly

- Medical Writing
- Pharmacovigilance
- Clinical Data Management
- Regulatory Affairs
- Market Research

- All the courses are relevant for students from all aculties of science, Pharma - undergraduates & graduates.
- There are many other courses which are under pipeline, to be resumed soon.

K. K. WAGH COLLEGE OF PHARMACY

(B. Pharmacy & D. Pharmacy)

Hirabai Haridas Vidyanagari, Amrutdham, Panchavati, Nashik - 422 003. (Maharashtra) India.

☎ : 0253 - 2221121, 2517003, 2510262 Web : www.pharmacy.kkwagh.edu.in

Email: principal-bpharmacy@kkwagh.edu.in, disp-bpharmacy@kkwagh.edu.in

(Affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere, MSBTE, Mumbai & Approved by PCI)

Title of course: Hands on Analytical Instruments

Duration: 2020-21 (13/03/2021 to 18/04/2021) [30 hours (limited hours on Saturday and Sunday)]

Course Coordinator: Mr. Rohan Pawar (RAP Analytical Research and Training Center Nashik)
and Dr. R. D. Amrutkar

SYLLABUS

- Industrial guidelines
- GMP/GLP/GDP guidelines
- Highlights on quality control
- Need of Research
- Standard operating procedure
- Variable Parameters and troubleshooting
- Hands on Training (HPLC, GC, UV-VIS, Disso, DT and Friability)

COURSE OUTCOMES

The course is designed to give the student an understanding in the operation and care of instruments used in the chemical laboratories of industry. At the end of the course, a student will be able to

- Understand the effects of different constituent in a process outcome and analysis the performance of various on-line or off-line instruments.
- troubleshooting instruments in the chemical laboratory
- Describe and differentiate between online and offline process and Identifies suitable instruments for analysis
- Perform experimental analysis

Duration: 2020-21 (01 November 2020 to 18 December 2020) [36 hours (online mode)]

Course Coordinator: Prof. P. V. Buge (Board for Upskill Growth of E-India, Pune) and

Prof. K. P. Baviskar

SYLLABUS

- Soft skill required in professional pharmacist
- Innovative customer handling
- Time tested sales improvement techniques
- Professional ways of window display
- Foundation of marketing and digital marketing
- Basic marketing parameter and interlinkages with sales function
- Team building and marketing promotion
- Planning and preparing timely recommendations

COURSE OUTCOMES

At the end of course the key take away will be,

- Best soft skills required to become successful and professional Pharmacist
- Time tested sales improvement techniques
- Manage smooth operation of shop
- Foundation of marketing parameters and interlinkages with sales function

Webinar Report

Soft Skills Development (Communication Skills)

Date: 21/08/2020

Time: 3.00 pm to 5.30pm

Resource person: Mr. Devadatta Gokhale, Gokhale's Advanced Training Institute, Jalgaon

The objective of the webinar: To learn how to develop soft skills and understand the importance of soft skills in professional life.

The outcome of the webinar: All attendees learned five types of professional communication: vocal, nonverbal, oral, written, and visual. Communication skills, flexibility and adaptability, decision-making skills, interpersonal skills, self-motivation and work ethic, leadership abilities, teamwork skills, creativity and problem-solving skills, time management, and the capacity to operate under pressure were all discussed. All these skills are definitely useful for each student.

Number of participants: 458

Event co-ordinator

Dr. S.P. Narkhede and Dr. R.M. Kakalij

Webinar Report

Soft Skills Development (Building Confidence)

Date: 20/08/2020

Time: 12.00 pm to 2.30p

Resource person: Mr. Rashmi Gokhale

The objective of the webinar: To enable attendees to interact effectively and harmoniously by adapting various soft skills.

The outcome of the webinar: This is a subject in which we should all be deeply interested because soft skills are personal attributes and other non-technical abilities that help you work and communicate with other people. All attendees came to know which things we should do to build up our confidence

Number of participants: 450

Event co-ordinator: Dr. S.P. Narkhede and Dr. R.M. Kakalij

Title of course: Certificate Programme in Good Manufacturing Practices

Duration: 2018-19 (18/03/2019 to 18/04/2019) [30 hours]

College Course Coordinator: Dr. M. D. Burande (Institute of Pharmaceutical Education and Research Pune) and Prof. Deepali K. Kadam

SYLLABUS

A. Principles and Practice of Pharmaceutical Management

- Concept of Management
- Functions of Management
- Importance of Pharmaceutical Production Management

B. Good Manufacturing Practices in Pharmaceutical Industry

- GMP Factory premises-General requirements
- Environmental Factors - Dust collection - Cross contamination and mix up
- Sterile product working space and storage area
- SOPs and SCPs
- Requirement of plant and equipment in each production department with min. sq. feet area and other department
- Particulars to be shown in manufacturing records as per GMP norms

C. Validation

- Validation – Preamble, Objective, Benefits, General guidelines
- Guidelines to quality for validation

D. Documentation

- Master formula record, Batch manufacturing record, Master production records
- Equipment cleaning and use records
- Laboratory records
- Complaint files

E. Hygiene objective and scope

- Personal Hygiene, Hygienic operations and Protective clothing

F. Sanitation objective and scope

- Selection and use of cleaning agents and disinfectants

A confidence building workshop was organised on **1st November 2018** for both F. Y. and S. Y. Students. The workshop was conducted by Mr. And Mrs. **Devdutt Gokhale** of **Gokhale's Advanced Training Institute, Jalgaon**. The objective of the workshop was that as the students of junior college have to face many challenges when entering into a technical / professional institute. Adjusting to a new environment is not always easy. Every student has to face this change. In this case self confidence plays very important role. So the orientation workshop primarily focused on developing the communication and presentation abilities of an individual. These are the basic abilities required and are very important in developing self-confidence and make them ready to face new challenges. The workshop was conducted for 4 hrs using Power-point presentations and Activities & case studies. It included Effective study techniques, positive thinking, motivation, time management, Introduction to communication, factors, tools and barriers in effective communication, Presentation techniques, tips on body language and Activities.

TRAINING COMPLETION CERTIFICATE

Training title: Confidence Building Workshop

Name of organization: K. K. Wagh College of Pharmacy, Nashik

Date: 01st November 2018

Trainers: Rashmi Gokhale and Devdatta Gokhale

Topics covered: Effective study techniques, time management, motivation, communication skills, English communication and impressive presentations.

No of participants: 111

Overall feedback:

The workshop was very well conducted. It surely motivated the students. Also students got an idea about time management & utilization. It also emphasised the techniques for good presentation skills. & it will surely help the students.

All the students were contented.
Looking forward to work together again.

Sub: Proposal for one-day workshop on Confidence Building

Dear Sir,

Please allow me to introduce our institute. GATI - Gokhale's Advanced Training Institute, founded in 2012 at Jalgaon (Maharashtra) is located in the heart of city. This is an organisation devoted to skills development. We provide trainings in personality development, soft skills, professional English communication and stress management to the students, faculties and professionals.

We thank you for the interest shown in our training programs. As discussed, please find attached the training contents and the commercial proposal for the one-day workshop on Confidence Building

With sincere regards,

Devdatta C. Gokhale
Director

Confidence Building Workshop

1.1 Objective

The students of junior college have to face many challenges when entering into a technical / professional institute. Adjusting to a new environment is not always easy. Every student has to face this change. Here, self confidence plays very important role. This orientation workshop is primarily focused on developing the communication and presentation abilities of an individual. These are the basic abilities required and are very important in developing self-confidence and make them ready to face new challenges.

1.2 Methodology

- Power-point presentations
- Activities & case studies

1.3 Module contents

- Effective study techniques, positive thinking, motivation, time management
- Introduction to communication, factors, tools and barriers in effective communication.
- Presentation techniques, tips on body language.
- Activities

1.4 Batch size

- Maximum 100 students per batch.
- The maximum limit is essential for effective implementation of the training.

1.5 Revised Commercials

- Rs. 7,000/- per batch (lump sum charges, inclusive of travelling and taxes)

1.6 Duration

- Four hours

1.7 Tentative dates

- 29th October (will confirm the same tomorrow) or 01st November or 02nd November 2018

STUDENT NOTICE

CONFIDENCE BUILDING PROGRAMME

One important key to success is self confidence. An important key to self confidence is preparation!

A four hours workshop is to be organized in our college for helping the students to develop self confidence.

Interested students will have to pay around 120 rupees per head for the workshop.

The details of the workshop are attached.

Interested students please submit your names to Prof. S. H. Patil by 11/10/2018 i. e. this Thursday.

S. H. Patil
Principal
