ABSTRACT: Stress is a complicated process that affects everyone differently. When the body is exposed to stressors, it initiates a series of coordinated responses called "stress responses," which include behavioral changes, immunological regulation, hormone release, and various physiological changes. Stress is the physiological response to risk or pressure, and it displays physically as fatigue or energy loss and psychologically as irritation or tension. Chronic stress or despair, which are issues of unmet health care need, may develop if they remain untreated. Treatment and preventative strategies that are based on scientific evidence are required. Current medicines show a therapy gap. The majority of medications solely address psychological or physical stress symptoms. Furthermore, neurobiological medicines, which are occasionally given for

Abstract: The COVID-19 pandemic, caused by SARS-CoV-2, has emerged as a global health crisis. This review article aims to provide an overview of clinical research and its applications in drug discovery and management of COVID-19 in India. The article discusses the importance of clinical research in understanding the disease, developing effective treatments, and managing the pandemic. It also highlights the challenges faced by researchers and the need for collaborative efforts to overcome them. The article is structured into four main sections: Introduction, Clinical Research in Drug Discovery, Clinical Research in Management of COVID-19, and Conclusion. The Introduction provides a brief overview of the COVID-19 pandemic and the role of clinical research. The Clinical Research in Drug Discovery section discusses the various stages of drug discovery, from target identification to clinical trials, and the challenges faced by researchers. The Clinical Research in Management of COVID-19 section discusses the various clinical trials conducted to evaluate the efficacy and safety of different treatments for COVID-19. The Conclusion summarizes the key findings of the review and highlights the need for continued research and collaborative efforts to manage the pandemic effectively.
